Properties can be let if they have an energy rating from A to E.

Rules on letting this property

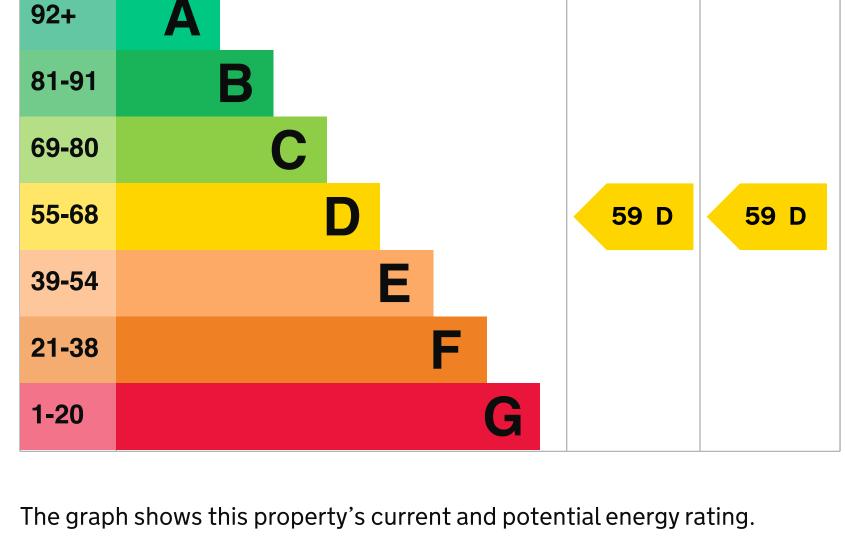

You can read guidance for landlords on the regulations and exemptions.

This property's energy rating is D. It has the potential to be D.

Energy rating and score

See how to improve this property's energy efficiency.

Score Energy rating

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales: • the average energy rating is D

• the average energy score is 60

Breakdown of property's energy performance

efficient they are. Ratings are not based on how well features work or their condition.

Features in this property

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Features get a rating from very good to very poor, based on how energy

Description Rating Feature Average thermal transmittance 0.51 Good Walls W/m²K

Windows	High performance glazing	Very good
Main heating	Room heaters, electric	Very poor
Main heating control	Programmer and appliance thermostats	Good
Hot water	Gas boiler/circulator	Average
Lighting	Low energy lighting in all fixed outlets	Very good
Roof	(other premises above)	N/A
Floor	(other premises below)	N/A
Secondary heating	None	N/A
Air tightness	(not tested)	N/A

of your energy bills.

improving this property's energy rating.

square metre (kWh/m2).

► About primary energy use

How this affects your energy bills An average household would need to spend £1,168 per year on heating, hot water and lighting in this property. These costs usually make up the majority

You could **save £0 per year** if you complete the suggested steps for

The primary energy use for this property per year is 192 kilowatt hours per

living at the property may use different amounts of energy for heating, hot water and lighting.

This is **based on average costs in 2015** when this EPC was created. People

Estimated energy needed in this property is: • 5,299 kWh per year for heating • 2,907 kWh per year for hot water

Impact on the environment

Carbon emissions

An average household produces

Heating this property

This property's environmental impact rating is D. It has the potential to be D. Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

This property produces 4.0 tonnes of CO2 4.0 tonnes of CO2 This property's potential production

You could improve this property's CO2 emissions by making the suggested

Steps you could take to save energy

The assessor did not make any recommendations for this property.

Advice on making energy saving improvements

Help paying for energy saving improvements

You may be eligible for help with the cost of improvements:

• Free energy saving improvements: <u>Home Upgrade Grant</u>

• Insulation: Great British Insulation Scheme

These ratings are based on assumptions about average occupancy and

energy use. People living at the property may use different amounts of energy.

changes. This will help to protect the environment.

Get detailed recommendations and cost estimates

• Heat pumps and biomass boilers: <u>Boiler Upgrade Scheme</u> • Help from your energy supplier: <u>Energy Company Obligation</u>
