Energy performance certificate (EPC)

Maple Fields Orchard Lane Hanwood SHREWSBURY SY5 8LD Energy rating

Valid until: 25 February 2030

Certificate number: 8720-7132-6120-4846-4226

Property type

Detached bungalow

Total floor area

161 square metres

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance</u> for <u>landlords</u> on the <u>regulations</u> and <u>exemptions</u> (<u>https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-quidance</u>).

Energy rating and score

This property's current energy rating is C. It has the potential to be B.

<u>See how to improve this property's energy efficiency.</u>

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature | Description | Rating |
|----------------------|------------------------------------------|-----------|
| Walls | Average thermal transmittance 0.20 W/m²K | Very good |
| Roof | Average thermal transmittance 0.11 W/m²K | Very good |
| Floor | Average thermal transmittance 0.11 W/m²K | Very good |
| Windows | High performance glazing | Very good |
| Main heating | Boiler and underfloor heating, oil | Average |
| Main heating control | Time and temperature zone control | Very good |
| Hot water | From main system | Average |
| Lighting | Low energy lighting in all fixed outlets | Very good |
| Air tightness | Air permeability 2.8 m³/h.m² (as tested) | Very good |
| Secondary heating | Room heaters, wood logs | N/A |

Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO2. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

· Biomass secondary heating

Primary energy use

The primary energy use for this property per year is 99 kilowatt hours per square metre (kWh/m2).

How this affects your energy bills

An average household would need to spend £706 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could **save £58 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2020** when this EPC was created. People living at the property may use different amounts of heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 8,107 kWh per year for heating
- 2,360 kWh per year for hot water

More ways to save energy

Find ways to save energy in your home by visiting www.gov.uk/improve-energy-efficiency.

| Environmental impact of this property | | This property produces | 3.8 tonnes of CO2 |
|----------------------------------------------------------------------------------|-----------------|-----------------------------------------------------------------------------------------------------------------------------|-------------------|
| This property's current envi | • | This property's potential production | 2.5 tonnes of CO2 |
| Properties get a rating from on how much carbon dioxic produce each year. CO2 ha | le (CO2) they | You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment. | |
| Carbon emissions | | These ratings are based on assumptions about | |
| An average household produces | 6 tonnes of CO2 | average occupancy and energy use. People living at the property may use different amounts of energy. | |

Changes you could make

| Step | Typical installation cost | Typical yearly saving |
|------------------------------|---------------------------|-----------------------|
| 1. Solar water heating | £4,000 - £6,000 | £58 |
| 2. Solar photovoltaic panels | £3,500 - £5,500 | £324 |

Paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name Julie Lock
Telephone 01743258748

Email julie.lock@shropshire.gov.uk

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme Elmhurst Energy Systems Ltd

Assessor's ID EES/019036 Telephone 01455 883 250

Email <u>enquiries@elmhurstenergy.co.uk</u>
