based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

#### Paragy Zillelene Afeiline

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Based on calculated energy use of 251 kWh/m²/yr, your current rating is band C (70). The average rating for a home in Scotland is band D (61).

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

## Baviroamentalimpadi (60%) Reititt

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO2) emissions. The higher the rating, the less impact it has on the environment.

Based on calculated emissions of 2 kg CO2/m²/yr, your current rating is band C (69). The average rating for a home in Scotland is band D (59).

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

## िल्लु बर्भीलाइ you can take to save money and make your home more efficient

	Indicative cost	Typical savings over 3 years	Available with Green Deal
Recommended measures	indicative cost	over 3 years	Green Dear
1 Floor insulation (suspended floor)	£800 - £1,200	£207	<u> </u>
	£15	£51	
Low energy lighting Solar water heating	£4,000 - £6,000	£84	<u> </u>

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

The Green Deal may allow you to make your home warmer and cheaper to run at no up-front capital cost. See your recommendations report for more details.
