

Energy performance certificate (EPC)

| | | |
|--|---------------------------|---|
| FLAT 35 COUNTY MEWS SANDES AVENUE KENDAL LA9 4LL | Energy rating D | Valid until: 1 July 2031 |
| | | Certificate number: 0310-2952-8030-2609-2751 |

| | |
|------------------|------------------|
| Property type | Top-floor flat |
| Total floor area | 30 square metres |

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property's energy rating is D. It has the potential to be C.

[See how to improve this property's energy efficiency.](#)

| Score | Energy rating | Current | Potential |
|-------|---------------|---------|-----------|
| 92+ | A | | |
| 81-91 | B | | |
| 69-80 | C | | 73 C |
| 55-68 | D | 58 D | |
| 39-54 | E | | |
| 21-38 | F | | |
| 1-20 | G | | |

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature | Description | Rating |
|----------------------|---|-----------|
| Wall | Cavity wall, as built, insulated (assumed) | Good |
| Roof | Pitched, 100 mm loft insulation | Average |
| Window | Fully double glazed | Average |
| Main heating | Room heaters, electric | Very poor |
| Main heating control | Programmer and appliance thermostats | Good |
| Hot water | Electric immersion, off-peak | Poor |
| Lighting | Low energy lighting in 80% of fixed outlets | Very good |
| Floor | (another dwelling below) | N/A |
| Secondary heating | None | N/A |

Primary energy use

The primary energy use for this property per year is 532 kilowatt hours per square metre (kWh/m²).

► [About primary energy use](#)

How this affects your energy bills

An average household would need to spend **£739 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £234 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2021** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 3,221 kWh per year for heating
- 1,849 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is E. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

| | |
|--------------------------------------|-------------------------------|
| An average household produces | 6 tonnes of CO ₂ |
| This property produces | 2.7 tonnes of CO ₂ |
| This property's potential production | 2.5 tonnes of CO ₂ |

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

► [Do I need to follow these steps in order?](#)

Step 1: Increase loft insulation to 270 mm

| | |
|---------------------------|-------------|
| Typical installation cost | £100 - £350 |
|---------------------------|-------------|

| | |
|-----------------------|-----|
| Typical yearly saving | £52 |
|-----------------------|-----|

| | |
|--|------|
| Potential rating after completing step 1 | 61 D |
|--|------|

Step 2: Hot water cylinder insulation

Increase hot water cylinder insulation

| | |
|---------------------------|-----------|
| Typical installation cost | £15 - £30 |
|---------------------------|-----------|

| | |
|-----------------------|-----|
| Typical yearly saving | £26 |
|-----------------------|-----|

| | |
|---|------|
| Potential rating after completing steps 1 and 2 | 62 D |
|---|------|

Step 3: High heat retention storage heaters

| | |
|---------------------------|---------------|
| Typical installation cost | £800 - £1,200 |
|---------------------------|---------------|

| | |
|-----------------------|------|
| Typical yearly saving | £156 |
|-----------------------|------|

| | |
|--|------|
| Potential rating after completing steps 1 to 3 | 73 C |
|--|------|
