# Energy performance certificate (EPC)

1, Carroway Close BRIDLINGTON YO16 6YW

Energy

Valid 25 until: February 2029

Certifi**017**2numb**2676-**6920-9821-7755

Property Detached bungalow type

Total 79 square metres floor area

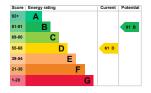

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance for</u> <u>landlords on the regulations and</u> <u>exemptions</u> (https://www.gov.uk/guidance/domesticprivate-rented-property-minimumenergy-efficiency-standard-landlordguidance). Energy rating and score

This property's energy rating is D. It has the potential to be B.

See how to improve this property's energy efficiency.

The graph shows this property's current and

potential energy rating. **Properties** get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

#### Breakdown of property's energy performance

#### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Wall	Cavity wall, as built, insulated (assumed)	Good
Roof	Pitched, 250 mm loft insulation	Good
Roof	Pitched, insulated (assumed)	Good
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Good
Lighting	Low energy lighting in 27% of fixed outlets	Average
Floor	Suspended, no insulation (assumed)	N/A
Floor	Suspended, insulated (assumed)	N/A
Secondary heating	Room heaters, mains gas	N/A

#### Primary energy use

The primary energy use for this property per year is 299 kilowatt hours per square metre (kWh/m2).

#### How this affects your energy bills

An average household would need to spend £901 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could **save £218 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2019** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

#### Heating this property

Estimated energy needed in this property is:

- 11,230 kWh per year for heating
- 2,101 kWh per year for hot water

#### Impact on the environmen

This property's environmental impact rating is D. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

#### Carbon emissions

An ( average tonne: household c produces CO; This property tor produces (

This property's to potential production

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environmen

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

### Changes you could make

Step	Typical installation cost	Typical yearly saving
1. Cavity wall insulation	£500 - £1,500	£82
2. Floor insulation (suspended floor)	£800 - £1,200	£65
3. Low energy lighting	£40	£37
4. Solar water heating	£4,000 - £6,000	£34
5. Solar photovoltaic panels	£5,000 - £8,000	£322

### Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade</u> <u>Scheme (https://www.gov.uk/apply-</u> <u>boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

#### More ways to save energy

Find ways to save energy in your home by visiting <u>www.gov.uk/improve-energy-</u> <u>efficiency</u>

## Who to contact about this certificate

#### **Contacting the assessor**

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's	Mark
name	Sanderson
Telephone	07740866421
Email	info@marksande

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation	ECMK	
scheme		
Assessor's ID	ECMK301832	
Telephone	0333 123 1418	
Email	info@ecmk.co.u	

#### About this assessment

Assessor's	No related party
declaration	

Date of assessment	26 February 2019 26 February 2019		
Date of certificate			
Type of assessment	RdSAP	RdSAP (Reduced data Standard Assessme Procedure a method used to assess ar compare energy ar environme performar of propert in the UK. uses a sit visit and survey of property t calculate energy performar	
		This type assessme can be carried ou properties built befor April 2008 England a Wales, ar 30 Septer 2008 in Northern Ireland. It also be us for newer
