How this affects your energy bills

An average household would need to spend **£5,447 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £3,280 per year** if you complete the suggested steps for improving this property’s energy rating.

This is **based on average costs in 2024** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 26,533 kWh per year for heating
- 2,084 kWh per year for hot water

Impact on the environment

This property’s environmental impact rating is G. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

Carbon emissions

| | |
|--------------------------------------|--------------------|
| An average household produces | 6 tonnes of CO2 |
| This property produces | 15.0 tonnes of CO2 |
| This property’s potential production | 5.5 tonnes of CO2 |
