Additional information about this property:

- Cavity fill is recommended

## How this affects your energy bills

An average household would need to spend **£7,550 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £2,136 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2024** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

## Heating this property

Estimated energy needed in this property is:

- 65,291 kWh per year for heating
- 3,671 kWh per year for hot water

## Impact on the environment

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

## Carbon emissions

<b>An average household produces</b>	6 tonnes of CO2
<b>This property produces</b>	26.0 tonnes of CO2
<b>This property's potential production</b>	18.0 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.
