Energy performance certificate (EPC)

Certificat@360number: 2943-9190-2692-4201

Property Ground-floor flat type

Total 68 square metres floor area

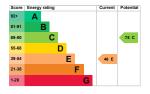

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance for</u> <u>landlords on the regulations and</u> <u>exemptions</u> (https://www.gov.uk/guidance/domesticprivate-rented-property-minimumenergy-efficiency-standard-landlordguidance). Energy rating and score

This property's energy rating is E. It has the potential to be C.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating. **Properties** get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Wall	Timber frame, as built, no insulation (assumed)	Poor
Window	Fully double glazed	Good
Main heating	Room heaters, mains gas	Average
Main heating control	No thermostatic control of room temperature	Poor
Hot water	Gas multipoint	Average
Lighting	Low energy lighting in 33% of fixed outlets	Average
Roof	(another dwelling above)	N/A
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	Portable electric heaters (assumed)	N/A

Primary energy use

The primary energy use for this property per year is 442 kilowatt hours per square metre (kWh/m2).

Additional information

Additional information about this property:

- Cavity fill is recommended
- Dwelling has access issues for cavity wall insulation
- Dwelling may have narrow cavities

How this affects your energy bills

An average household would need to spend £1,169 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could **save £662 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2022** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 10,318 kWh per year for heating
- 1,432 kWh per year for hot water

Impact on the environmen

This property's environmental impact rating is E. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

Carbon emissions

An (average tonne: household c produces CO This property tor produces (

This property's to potential production

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environmen

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

Step	Typical installation cost	Typical yearly saving
1. Cavity wall insulation	£500 - £1,500	£186
2. Floor insulation (suspended floor)	£800 - £1,200	£147
3. Low energy lighting	£20	£32
4. Condensing boiler	£3,000 - £7,000	£297

Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade</u> <u>Scheme (https://www.gov.uk/apply-</u> <u>boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.
